ESTABLISHED 1957

Dear Owner;

Your dog was DNA tested through Certagen, the ASCA recognized Lab located in Germany. Because one or both parents of your dog was tested with Therion, located in the United States, a full comparison of your dog's DNA result against it's parents' result was not done.

This has resulted in your dog being listed as DNA-CP (profiled) instead of DNA-VP (verified parentage).

If you would like the DNA result for your dog compared to the parent result on file at Therion and your dog's DNA status upgraded, please return the ASCA DNA certificate with this letter and submit \$10 (ten) dollars US via check, money order or credit card(enter information below). The fee will cover the charge from Therion to adjust and compare the sample.

I apologize for any inconvenience this may cause. We will process your request as quickly as possible.

Jean Miller
ASCA Business Office Manager
